Description

2. The following report and filter output will be all regular absentee voters (either for one election or calendar year) who have NOT provided a photo copy of their ID and have an active application for an upcoming election. The "Photo ID Provided" filter could be change to "true" if you desire a report for those who HAVE provided a copy of their photo ID:

RPTView_AESM_AbsenteeApplicationListing

And/Or	Field Name	Condition	Value
And	Election Date	Equals	05/19/2015
And	Abs App Type Code	Equals	Regular (REG)
And	photIDProvided	Equals	False

Description

In the below example, the same report and filter is used except this municipality is having a school referendum for only the voters in school district 2044. The district combo filter that includes that school code is added. This report output will only be those voters who have an active regular application for the election on 05/19/2015, have a district combo code that includes the school district and have not provided a copy of their photo ID for mail in absentee. This filter could be altered to include or exclude certain senate, assembly or other district voters for special elections when the whole municipality is not voting. Contact the G.A.B. with help for other district reports:
